Part 2

4. Roles/Sacrifices of American Soldiers

A. Battle conditions

In the European Theater of Operations (ETO) – extreme cold; lack of proper winter gear; trench foot and frostbite

Trenchfoot

AFIP CA-44-131, CA-44-176

FIGURE 64.—Subsiding inflammatory stage of trenchfoot. The right foot, on which the process was more severe than on the left, was treated by the local application of ice cold packs for a few days. The left foot was used as a control. A. Appearance of feet immediately after therapy. B. Feet shown in view A 4 weeks later. A better result had been expected, on the basis of the initial appearance of the feet. The wet ice treatment was considered of no value.

Frostbite

- In Germany soldiers endured shelling while holding the line during the Battle of the Bulge in Bastogne, Belgium,
- In the Pacific, soldiers endured Japanese Banzai attacks (sudden, suicidal frontal assaults)

There were extremely high casualty rates, especially in the Pacific

American Casualties (rounded)

- Combat deaths: 292,000
- Military deaths: 417,000
- Wounded: 671,000
- Total casualties: 1 million

C. Hispanic Americans

- 400,000 Hispanics served in integrated units in every branch of the military in WWII.

- Hispanics served as nurses, pilots, ground crew, infantry

- Hispanics served with distinction; many were awarded medals; 13 were Medal of Honor recipients

E. Navajo Code Talkers

Native Americans of all backgrounds served throughout the war in all branches

Marines recruited and trained Navajos to use a code based on their native language; it was never broken

Examples

- tank = "chay-da-gahi," (tortoise)
- dive-bomber = "gini," (chicken hawk, a bird which dives on its prey)
- submarine = "besh-lo" (iron fish)
- America = "ne-he-mah" (our mother)
- A = "Wo-La-Chee" (ant), or "be-la-sana" (apple), or "tse-nill" (ax)

“Were it not for the Navajos, the Marines would never have taken Iwo Jima.” Maj. Connor, 5th Marines.

5. Developments in Technology

A. Aviation

- Air power was a decisive factor in the war both over land and at sea

- Mass aerial bombings - created vast destruction of the targets
- fighters with increasing range (P-51s)
- jets (end of war)

B. Weaponry

Semi-automatic rifles (M-1 Garand)

Automatic rifles (Browning or “BAR”)

Machine guns –
(Thompson
Submachine gun)
made mobile fire
power more
intense and
destructive

Landing craft

- new kinds of landing crafts (Higgins Boats, amphibious landing craft: DUKWs, swimming tanks)

C. Communication

- Radio – improved battle communication; it was now wireless, and included the walkie-talkie (HT = handheld transceiver)

Communication

RADAR (Radio Detection And Ranging) – to find targets and detect enemy aircraft

SONAR (SOund Navigation And Ranging) to find targets and detect enemy vessels

FROM ORDINARY
MOLD—

*the Greatest Healing
Agent of this War!*

On the gentle, green-and-yellow mold above, called *Penicillium notatum* in the laboratory, grows the miraculous substance first discovered by Professor Alexander Fleming in 1928. Named penicillin by its discoverer, it is the most powerful weapon ever developed against many of the deadliest infections known to man. Because research on molds was already a part of Schenley's enterprise, Schenley Laboratories were well able to meet the problem of large scale production of penicillin, when the great need for it arose.

When the thousands of letters of this war have subsided to pages of silent print in a history book, the greatest news event of World War II may well be the discovery and development — not of some vicious secret weapon that destroys — but of a weapon that saves lives. That weapon, of course, is penicillin.

Every day, penicillin is performing more unbelievable acts of healing on some far battlefield. Thousands of men will return home who otherwise would not have had a chance. Better still, more and more of this precious drug is now available for civilian use...to save the lives of patients of every age.

A year ago, production of penicillin was difficult, costly. Today, due to specially devised methods of mass-production, in use by Schenley Laboratories, Inc. and the 20 other firms designated by the government to make penicillin, it is available in ever-increasing quantity, at progressively lower cost.

Shown in "THE DOCTOR HUNTS" starring Bette Davis and John Garfield. Tuesday evenings, 8 P.M. Don't miss your chance for time and motion.

near which is an areaway, 25 feet deep and eight by six feet wide. The burglars placed an 18-foot ladder in the areaway, then put an iron grating over the top so they could hang onto it and reach the ladder to climb down. Holland reported.

The rear door at the bottom of the areaway was unlocked. The burglars forced a second door at the end of a hallway by breaking an upper middle panel. Holland reported. The pins also were removed from the hinges of the door.

Holland reported the entry looked "like an experienced job" and not the work of juveniles. Sampson discovered the burglary when he opened for business this morning. The shop had been closed since 8 P. M. yesterday.

Milkweed Pod Collection Will Start Tomorrow

A citywide campaign for the collection of milkweed pods for use in life preservers will be launched tomorrow by Syracuse school children.

Two thousand onion bags for the collection of the floss have been contributed by the New York State College of Forestry Experimental Station. Boy Scouts were escorted to the college by members of the Red Cross Motor Corps to pick up the bags and then took them to 50 city schools.

The children will obtain the bags at the schools tomorrow and will begin their collection of the floss immediately. One bushel of the milkweed pods makes a life jacket, and children will receive 20 cents for each filled bag.

Lloyd G. Strombeck, 4-H Club agent, is in charge of the distribution of the bags. The floss, he said, is used as a substitute for kapok, the supply of which was cut off when Japan seized Java.

Zoot Suit Riots

- Mexican-American youth wore Zoot Suits to dance and socialize; some saw this as unpatriotic

- Zoot Suits used a lot of fabric as compared to military uniforms and the new styles of suits they inspired

- Fred Korematsu challenged the law, but the Supreme court ruled that relocation was constitutional because it was based not on race, but on “military urgency.” (Dec. 1944)

- Two other cases, *Hirabayashi v. United States* and *Yasui v. United States* also found relocation constitutional during the war.

Japanese-American men sometimes volunteered to go the camps early to help build the barracks

Camps were in isolated places where it was hot in the summer, cold in the winter

They lived in barracks that were not well insulated and in which they had no privacy.

Internment was particularly demoralizing to men since they had been the breadwinners, but now had nothing to do

7. Results of the War

A. Social Results

- WWII Casualty estimates (dead worldwide)
 - Military – 22-25 million
 - Civilian – 34-46 million
 - Total – 62-78 million

- Millions were displaced, homeless. The Red Cross helped many to find shelter and to try to reconnect with family

B. Economic

- Cost: \$296 Billion to the US (about \$1 trillion today)
- \$1,600,000,000,000 — direct economic costs of WWII internationally

- Shattered economies in Europe and Asia; struggle to rebuild and recover after war

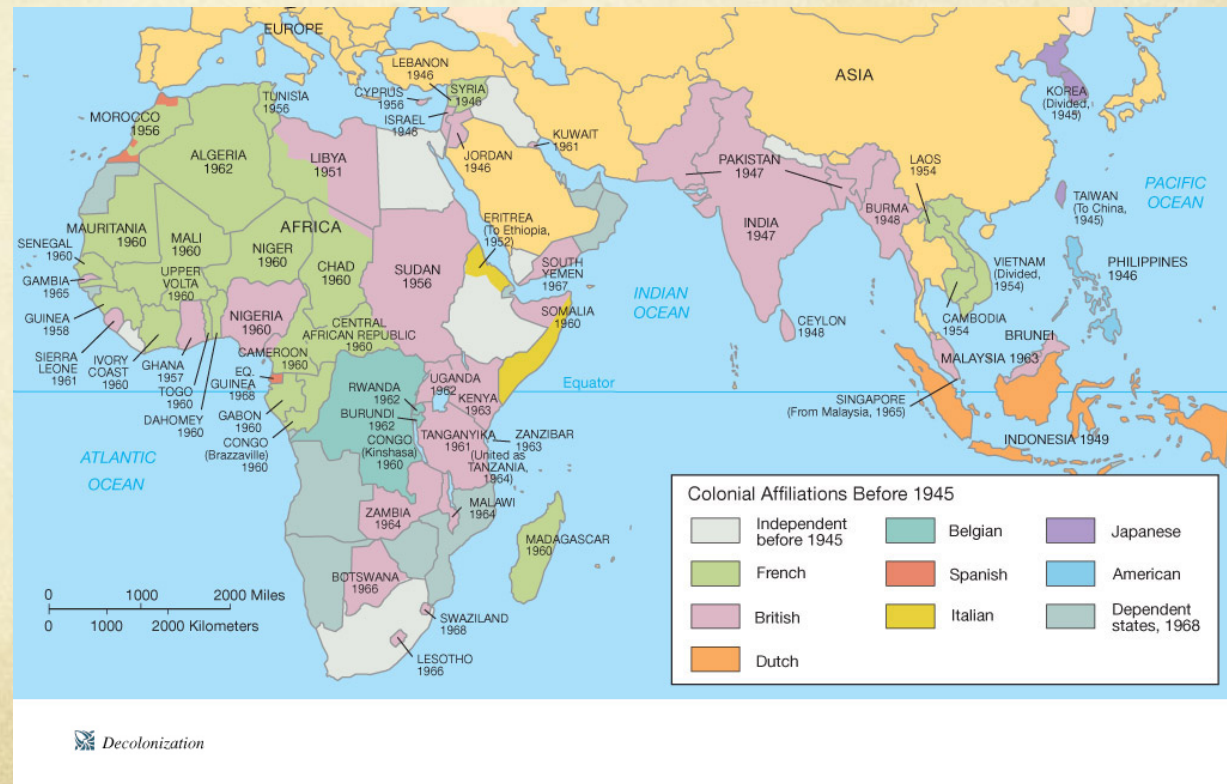

C. Political

- Regime change in Europe and Asia after occupation
- US implements Marshall Plan to support western European countries economically
- Creation of Israel 1948 as a homeland for displaced Jews

- U.S. emerges from the war as a super-power
- Britain, France, others, reduced in power

- USSR emerges as leading Communist power; creates Soviet Bloc (countries aligned with USSR, also known as Soviet Satellite countries)
- Cold War tensions begin; last for 40 years

ВЕЛИКИЙ СТАЛИН-ЗНАМЯ ДРУЖ

- United Nations was created to keep the peace;
- US plays central role (UK, USSR, France, China – on permanent UN Security Council)

- The U.S. stays actively involved in world politics from WWII until the present.
